**SUMMARY**

The **St. John’s Hospital Family Medicine Residency Program** offers robust training in inpatient medicine, obstetrics, and clinic-based care.

The clinic is located in a diverse, urban neighborhood in St. Paul. Patients include a well-established, ethnically diverse population, ranging from newborn to geriatric age.

St. John’s Hospital is a community-based, award-winning hospital. Family medicine is well respected and vital to the hospital’s success. The busy emergency room, ICU, and OB service complement in-depth teaching services in internal medicine, pediatrics, and surgery.

Each academic class includes six residents. The program has filled in the National Resident Matching Program Match every year since 1990.

**What Our Residents Say:**

“The diverse, challenging patient population appealed to me. I also liked the small-town feel of the hospital with the urban clinic. I like that hospital call is full spectrum and similar to actual practice.”
